

INDUSTRIAL EXHAUST FAN

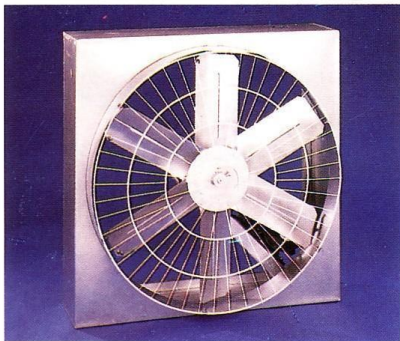

NOISELESS

1. The ventilation draws cool air into the factory.
2. The ventilation drains hot air out of the factory.
3. A relay system forces the air circulation and prevents the hot air flow entering.
4. The cool air is flowing in the factory.

Models : **HE - 32**

For hanging on from the ceiling or attached to wall / window.

Size: 370 mm x 910 mm x 910 mm (32")

Usage: Suitable for any kind of workshop and warehouse, especially for the hot, air-polluted and poor air circulation space.

Specification:

- * Low noise – 74 db.
- * Large air quantity: 9430 CFM.
- * Long blowing distance: 15 M Length
5 M Width
- * Fanblade diameter: 32"
- * Fan speed: 630 R.P.M.
- * Air blowing velocity: 8.6 m/s
- * Power consumption: 0.37 kw ½ Hp.
- * Fanblades: 6 pcs
